Summary

Commercial data and analytics professional with 5+ years of experience operating in GTM and RevOps environments, translating complex, multi-source data into trusted insights that drive monetization, growth and strategic decision-making. Proven track record in data consolidation, KPI standardization, dashboard ownership and data quality governance across cloud CRM and BI platforms. Experienced in partnering with product, engineering and commercial teams across emerging markets to enable reliable, decision-ready analytics.

Core Skills

Data & Analysis: SQL-based reporting (working proficiency), Tableau, Power BI, Salesforce Analytics, HubSpot Analytics, Demandbase Analytics. **Data Engineering & Automation:** ETL ownership (requirements, validation, quality), workflow automation, system integrations. **Platforms:** Salesforce, HubSpot, Demandbase, Amplemarket, ZoomInfo, LinkedIn Sales Navigator, Chorus. **Business Intelligence:** KPI definition, dashboard standardization, executive & partner reporting. **Strategy & Governance:** Metrics frameworks, data quality, reporting standards, single source of truth. **Collaboration:** Product, Engineering, GTM, Marketing, Sales and Leadership stakeholders.

Professional Experience

CloudFactory Kenya Limited — *GTM Operations Specialist, Commercial Data & Analytics Focus*
January 2022 – Present

Data Strategy & Value Creation

- Own commercial and GTM data foundations across Salesforce, HubSpot, Demandbase and Tableau, enabling leadership visibility into pipeline health, campaign ROI and account performance.
- Lead KPI definition and standardization across marketing and sales to create a single, trusted view of performance used for strategic and monetization decisions.
- Deliver insight-led analysis supporting growth initiatives, account prioritization and campaign optimization.

Trust, Quality & Governance

- Accountable for data quality, lifecycle integrity and reporting reliability across CRM and marketing platforms.
- Redesigned the marketing contact lifecycle and non-marketing qualification rules in HubSpot, reducing the active marketing contact base from roughly 74,000 to 60,000 to control platform cost and improve list quality, without disrupting active sales workflows.

- Resolve ETL, sync and automation failures; partner with data and engineering teams to ensure build-ready requirements and stable pipelines.
- Establish reporting, campaign and workflow governance to eliminate fragmented and bespoke reporting.

Decision Enablement & Automation

- Build and maintain executive-ready dashboards and partner-facing reports in Tableau and Salesforce.
- Automate lead scoring, lifecycle management and campaign workflows to improve efficiency and scalability, lifting weekly qualified-lead throughput from roughly 10 to 18 MQLs without adding headcount.
- Validate SQL-based reporting outputs and ensure analytical accuracy before stakeholder consumption.
- Translate complex datasets into clear narratives for non-technical stakeholders across GTM, product and leadership teams.

Kenya Postel Directories — *Systems Support Manager* November 2011 – December 2021

- Owned performance, reliability and data quality across CRM and ERP systems supporting multi-country operations.
- Led Salesforce CRM rollout, reporting improvements and end-user training across East and West Africa.
- Improved operational decision-making through enhanced reporting, billing analytics and system integrations.

Education & Training

- **MBA, Strategic Management** (Ongoing) — JKUAT
- **Data Analytics, Excel & Power BI** — Moringa School (2025–2026)
- **BBIT, Networking** — Africa Nazarene University (2013–2016)
- **Diploma, Information Technology** — Technical University of Kenya (2006–2009)

Certifications

- Salesforce Certified Administrator
- Salesforce Certified Platform App Builder
- HubSpot Reporting — HubSpot Academy
- HubSpot Marketing Software — HubSpot Academy
